INTELLIGENT LOG DATA INGESTION MANAGEMENT

***REDUCE INGESTED LOG VOLUMES BY UP TO 30% WITH
KHIPU INTELLIGENT LOG DATA INGESTION MANAGEMENT***

THE CHALLENGE: DATA GROWTH VS. BUDGET REALITY

Log data is the lifeblood of security and operations, but its sheer volume is becoming a major headache. Industry analysts report telemetry data growth at a staggering 28% annually, yet IT budgets aren't keeping pace.

This widening gap forces difficult choices: reduce data collection (and potentially compromise visibility), or face spiralling costs for storage, processing, and licensing. Traditional SIEMs and logging systems struggle to cope, ingesting massive amounts of data that often contains significant redundancy and noise.

THE KHIPU SOLUTION: INTELLIGENT INGESTION FOR MAXIMUM VALUE

KHIPU Networks' Intelligent Log Data Ingestion Management service offers a smarter approach. Instead of simply ingesting everything, we intelligently filter and transform your log data before it reaches its destination. This results in dramatically reduced volumes, lower costs, and more valuable insights.

HOW IT WORKS...

HOW IT WORKS: A MULTI-FACETED APPROACH

Our service employs a powerful combination of techniques:

INTELLIGENT FILTERING

Advanced algorithms analyse log data in real-time, identifying and discarding irrelevant or redundant information. This significantly reduces the volume of data requiring processing and storage, accelerating data onboarding by up to 80%.

DATA TRANSFORMATION

Raw log data is transformed into a standardised and enriched format. This makes it easier to analyse, correlate, and use for security investigations, compliance audits, and business intelligence, increasing the value of your data.

SCALABILITY & FLEXIBILITY

The service is designed to scale seamlessly with your growing data volumes, ensuring consistent performance and cost-effectiveness as your needs evolve.

THE BENEFITS: REAL-WORLD IMPACT

SIGNIFICANT COST REDUCTION

Reduce log ingestion volumes by up to 50%, directly impacting your infrastructure and licensing costs. We've helped customers achieve storage cost reductions of up to 75%.

DEEPER INSIGHTS

Extract more valuable information from your log data by improving data quality and reducing noise.

IMPROVED SYSTEM PERFORMANCE

Enhance the speed and efficiency of log data analysis, enabling faster threat detection and response.

ENHANCED SECURITY POSTURE

Focus on relevant security events and minimise false positives, strengthening your threat detection capabilities

**REDUCE LOG
INGESTION
VOLUMES BY UP TO** **30%**

**BENEFITS TO 24X7X365 CYBER THREAT
PROTECTION ...**

BENEFITS FOR SECURITY OPERATIONS CENTRE (SOC) SERVICES

For 24x7 Security Operations Centres, our service delivers critical advantages:

FASTER THREAT DETECTION

Focus analysts on critical security alerts by drastically reducing the volume of irrelevant data.

ENHANCED THREAT HUNTING

Conduct more effective threat hunting activities by improving data quality and reducing noise.

IMPROVED MEAN TIME TO DETECT (MTTD)

Respond to threats more quickly and minimise the impact of security incidents.

REDUCED ALERT FATIGUE

Filter out irrelevant alerts, allowing analysts to concentrate on genuine security issues.

**75% REDUCTION
